

## How to renew the Maintenance Agreement of your Site License?

### ➤ Key-on-install or fully keyless site license

- **Order your maintenance agreement**

Annual Maintenance = if license still under maintenance agreement  
 Reinstated Maintenance = if maintenance agreement has expired for less than two years from last expiration date.

- **Site license update procedure**

After having purchased your maintenance agreement you will be notified that a new "Site license setup file" is available on FasTrak's website.

The update of your site license setup can now be downloaded from FasTraks website [www.fast-soft.com](http://www.fast-soft.com) following below procedure:

- Go to sign-up section: Enter your Username & your Password (this access information was previously provided to you for a site license file download)
- Menu « Downloads », choose « Site Licenses »
- Download the site license setup file for the corresponding site license
- Executing the site license file (double click) on the computer on which the site license is installed will update the expiry date of your site license. At this occasion, you will need to type the site license password (this is the password you chose when purchasing the site license).

**Site Licenses**

Available for all of our software products, a FasTrak site license allows for tracking of user activities. Coordinating software use among multiple users keyless alternative eliminates worries about traffic. Site licenses are distributed with installation CDs. Site license customers may download additional copies of their site licenses here. If you are a site license customer, log in now to view and download your company's site licenses. If you do not know the login to access your company's site licenses, please contact your company's site license administrator.

If you are not a site license customer, call Sales at 262-238-8088 today or Contact Us by email 24 hours a day to learn more about the power and convenience that site licenses can bring to your FasTrak software products.
