FTSolution for APT® V1.3.6

We are pleased to announce that **FTSolution for APT® V1.3.6** is available for download. Click [here](#) to view the complete version details.

This new version of **FTSolution for APT®**, available for free download on FasTrak's website, can be immediately installed and used if your license is covered by a maintenance agreement. If you need help to determine the maintenance status of your license or if you are interested in FTSolution for APT® software, do not hesitate to contact our sales team.

Detailed information about **FTSolution for APT®** software and its Options is also available on our website, [just click here](#).

[Download latest version now](#) by taking note of [below important technical information](#).

Solutions created in previous versions will be automatically updated when opened in FTSolution for APT® v1.3.0 or higher. As part of this update, Projects that are in an incrementally compiled state will automatically be incrementally compiled. Immediately after the automatic compilation, FTSolution will display the Project Upgrade Warning screen to list the updated projects and an upgrade130.log file will be created within each of these projects. It is strongly recommended to perform an immediate full download for the affected projects. Until a full download is performed, the download incremental changes option will be disabled.

To see which version of FTSolution for APT® you are running, select the Help\About menu item. The version number is displayed on the first line of the About box.

Should you have technical questions about FTSolution for APT®, please
