

## Software Version : EasyBuilder Pro V6.04.02.597

#### **New Features**

1. (iP Series) Added support for EasyAccess 2.0.

#### **Corrections**

- **1.** Fixed an issue where project files created using an earlier version of EasyBuilder Pro may not be successfully compiled.
- 2. Fixed an issue where a temporary pause may be experienced when changing window with window transition animation. This occurs only after the screen is left untouched for a long time.
- **3.** Fixed the settings window of certain objects so that the redundant horizontal scrollbar no longer appears.

#### Drivers

1.	[Schneider M340/M580] series (Symbolic	Added driver.
	Addressing) (Ethernet)]	
2.	[OMRON EtherNet/IP (NJ/NX Series)]	Improved communication
		efficiency of BOOL array.
З.	[BACnet/IP Server]	Added support for setting device
		id (LW-12245).
4.	[Fuji SPH2000/3000 IEC mode (Ethernet)]	Added driver.

### Software Version : EasyBuilder Pro V6.04.02.552

#### **New Features**

#### **EasyBuilder Pro**

**1.** (iE, XE, eMT, mTV, iP) Added support for sorting by occurrence count for Event Display.

### Software Version : EasyBuilder Pro V6.04.02.546

#### **Corrections**

#### **EasyBuilder Pro**

- **1.** Fixed an issue where touch gestures cannot be configured properly.
- 2. (cMT) Fixed an issue where the displayed texts are not aligned as configured.
- **3.** (cMT) Fixed an issue where Set Word's [Before writing] notification setting is ineffective.
- 4. Added UnicodeLength macro function.

#### **cMT Viewer**

1. Fixed and issue where the popup window / indirect window / direct window may be displayed at an incorrect position.

#### EasyConverter

**1.** (cMT) Fixed an issue where confirmation records of event log files may be interpreted incorrectly.

#### **Drivers**

1.	[LS XBM/XBC Cnet]	Fixed communication issues
		related to RW, RW_Bit.
2.	[Schneider Powerlogic Modbus TCP/IP]	Added driver.

### Software Version : EasyBuilder Pro V6.04.02.508

#### **Corrections**

#### **EasyBuilder Pro**

- **1.** Increased the upper limit of the argument of DELAY function from 32767 to 2147483647.
- **2.** Fixed issues relating to the object centering tool.
- 3. Fixed an issue where the objects cannot be correctly resized using Ctrl +  $\leftarrow$  or  $\rightarrow$  key combinations.
- **4.** (iE, XE, eMT, mTV, iP) Fixed an issue where Unicode texts are not properly displayed in ASCII object.

#### **Drivers**

1. [FATEK FB/FBs/B1/B1z Series]

Added support for using octal addresses for WX WY WM WS.

V6.04.02

## Software Version : EasyBuilder Pro V6.04.02.483

### Corrections

#### **EasyBuilder Pro**

- 1. (cMT) Added Animation settings for selecting [Default] or [Shortest] rotation mode for Moving / Rotating Shape object.
- 2. (cMT) Added support for Latin-1 codec.
- **3.** (cMT) Added support for multi-line display for Alarm Bar object.
- **4.** (cMT Gateway) Added support for Action Trigger object. (Supports only the functions suitable for Gateway.)
- 5. (cMT) Added settings: [Embedded in parent window] or [Popup window] for Direct / Indirect Window. The setting determines whether the window is displayed on the top layer when it pops up.
- 6. (cMT-SVR) Fixed an issue where the screen saver does not work.
- **7.** (iE, XE, eMT, mTV) Fixed an issue where objects in momentary mode do not work properly.
- 8. (iE, XE, eMT, mTV) Fixed an issue where the channels are not displayed as configured in Trend Display object.
- **9.** Fixed an issue where the Video Input object may be displayed at an incorrect position if its dynamic RTSP URL is enabled.
- **10.** Fixed an issue where index registers do not work properly for certain objects.
- **11.** Fixed an issue where opening, editing, and decompiling certain project files may result in EasyBuilder Pro crash.

#### **Drivers**

1.	[Panasonic FP (Ethernet)]	Added support for importing
		tags in a CSV file.
2.	[Panasonic FP/KW]	Added DT_String address type.
<i>3</i> .	[Delta AS300 MODBUS RTU/ASCII]	Optimized communication
		efficiency by adopting
		multi-read mechanism.
4.	[OMRON EtherNet/IP (NJ/NX Series)]	Added support for accessing
		the String under Data Type.
5.	[Hengtong HT_EMS]	Added addresses: Dynamic

		Station Number and High
		Voltage Side Meter.
<i>6</i> .	[Siemens S7-1200/S7-1500 (Absolute	Added support for 64bit
	Addressing) (Ethernet)]	addresses.
7.	[CODESYS V3 (Ethernet)]	Added two data mapping
	[OMRON EtherNet/IP (NJ/NX Series)]	options for importing tags that
	[Schneider SoMachine M Series (Ethernet)]	contain IEC-61131 STRING data
	[OPC UA Client]	type.
8.	[CoDeSys V2 Symbolic Addressing (Ethernet)]	Fixed an issue where index
	[ProConOS]	registers do not work properly
	[Beckhoff TwinCAT PLC (Ethernet) Free Tag	when being used by certain
	Names]	address types.
	[Bosch Rexroth SIS (Symbolic Addressing)]	
	[IEC61850 MMS Client]	
	[Bosch Rexroth IndraControl – Free Tag Names	
	(Ethernet)]	
<i>9</i> .	[Panasonic FP (Ethernet)]	Fixed communication issues
		with devices of station
		number > 10.
<b>10</b> .	[OMRON EtherNet/IP (NJ/NX Series)]	Fixed an issue where BOOL
		array may not be correctly
		read.
11.	[OMRON CS/CJ/CP]	Added communication error
		handling protocol.
<b>12</b> .	[Inovance H5U MODBUS TCP/IP]	Added new driver.

# Software Version: EasyBuilder Pro V6.04.02.349

Supported Models

Added cMT-FHDX

Added cMT3072X

Added cMT3072XH

## **New Features**

#### EasyBuilder Pro

- **1.** Added support for defining file names in extended memories.
- 2. Adjusted address setting interface:
  - **a.** A new tags can be created using the current address setting.
  - b. The list of available address tags (including system and user-defined tags) can be opened by clicking the address type drop-down.

**3.** The content of the tags / strings (of address tag library/ string table, respectively) is also displayed in the selection field instead of just its ID.

#### **cMT Series**

All features listed in this section are available exclusively for cMT series only.

 1. [System
 Added support for setting mouse cursor size.

 Parameters]
 Action Trigger has two types, each with different modes for triggering action execution:

 Action Trigger (Global): Effective in all windows, and actions are

www.weintek.com

# **EasyBuilder Pro** Release Notes v6.04.02

triggered with [Idle timeout] or [Value changed] modes. Action Trigger (per-page): Effective only in the window where the object is placed, and actions are triggered with [Window on/off] or [Backlight on/off] modes.

**3.** [OPC UA Server]

Added support for OPC UA Historical Data Access (HDA). This feature is configured at each node.

- 4. [MQTT]
   Reclassified Connect State in System Topic into Birth Topic, Close

   Topic, and Last Will, the content of which can now be configured individually.
- 5. [MQTT] Added support for previewing message content in user-defined JSON format.

Name		Туре	Value	Address	Address Format
