CTI Announces Release of I/O Simulator Module for Compact I/O

Dear subscriber,

The [2500C-16-DIDO-SIM](#) allows the user to simulate discrete inputs and outputs. Switches are used to simulate discrete inputs and the LEDs on the front of the module indicates the status of the assigned outputs. This module is an excellent debugging tool for any application development.

See the [Product Bulletin](#).

For more information about 2500 Series®, please contact NAPA.
