FasTrak SoftWorks Inc. announces release of FTSolution for APT® V1.0.0!

Dear Clients,

We are very pleased to announce that the new APT® replacement product "**FTSolution for APT®**" developed by FasTrak is now released for shipping.

FTSolution for APT® allows to import, create, edit, compile, download and debug APT-based PLC programs with a modern Microsoft® Windows® interface.

FTSolution for APT® perfectly integrates with CTI's 2500 Series® family of processors since it supports:
* an expansion of CTI 2500-C400 processors control relays to 56.320 for larger program development
* larger CTI 2500 Series® processor memory for development of larger programs

FTSolution for APT® offers increased programming efficiency through Advanced Editors and includes powerful standard and expanded Debug Mode features.

Please check below links for more information:

• FTSolution for APT® product brochure
• Learn more about the advanced editors and expanded debug mode features

The following optional products are available for FTSolution for APT®:

FTSolution for APT® - Hardware Debugger
FTSolution for APT® - Simulator
FTVersionTrak for APT®

Each license is delivered including the usual 12-month maintenance service.

Validation service can be quoted on a program-by-program basis to certify a valid result from import, compilation and download with **FTSolution for APT®.** Please contact us for more details if needed.

A [demo version](#) of **FTSolution for APT®** is available allowing the import of a pre-designed APT® program. As an alternative, FasTrak engineers will be pleased to test the proper import of your own APT® program.

We stay at your disposal for any question you may have
or any additional information you may need.
