

FTSolution for APT® V1.1.2 now available including incremental compile

We are pleased to announce the new release V1.1.2 of FasTrak's "FTSolution for APT®" software **including incremental compile**. You can now make changes to the program in your PLC without stopping critical production.

This new version of FTSolution for APT®, available for free download on FasTrak's website, can be immediately installed and used if a license is under maintenance agreement.
