New release of FasTrak's "PLC WorkShop Suite/SuperSuite for 505®"

We are pleased to announce the new release of FasTrak's "PLC WorkShop Suite/SuperSuite for 505®" including:

PLC WorkShop for 505® V4.90

505Simulator V2.31 (coming soon)

FTVersionTrak / FTVersionTrak PE V1.7.4

Version V4.90 of 505WorkShop/PLC WorkShop incorporates the following [features and solutions](#):

- Added the ability to sort TCP/IP settings by description or IP address.
- Improved performance of line deletion edits within Special Function programs.
- Improved Cross Reference Table.
- Updated network deletion functionality to place and/or keep the PLC in edit mode.

A new version of PLC WorkShop, available for free download on FasTrak's website, can be immediately installed and used if a license is under maintenance agreement. If maintenance has expired for less than two years, a reinstated maintenance agreement can be purchased in order to use this newest software version. [Download 505WS Suite/SuperSuite V4.90 now.](#)

For obtaining the full benefit of offline program simulation and the security of version control and automated backup, **we recommend users of the 505WorkShop standalone software to migrate their license to the [505WorkShop Suite](#) or [505WorkShop SuperSuite](#).**

*** Important - please remember ***

Program files created and saved by Version V4.80 and higher will **not** be accessible by older versions of WorkShop due to an updated program file format in V4.80. V4.80 and higher WILL accept program files created and saved in all earlier versions of WorkShop.
