

## CTI Announces Release of 2572-B Fast Ethernet Adapter, direct replacement for 2572-A

CTI is pleased to announce the upcoming release of the **2572-B Fast Ethernet Adapter** for 2500 Series® Classic and Simatic®/TI 505. The 2572-B continues on the proud legacy of 2572 and 2572-A with the addition of a new front-panel IP address display and elimination of the serial configuration port. All configuration is now done over Ethernet using a standard web browser. Price of the 2572-B is the same as 2572-A.

CTI announces the maturity of the 2572-A Fast Ethernet TCP/IP Adapter for CTI 2500 Series® and Simatic®/TI 505 programmable controller systems, and its replacement by 2572-B.

This product is a late 1990's design and contains many parts which have been discontinued. In addition, the functions of this product have been replicated on our new 2572-B Fast Ethernet TCP/IP Adapter, which is a direct replacement for 2572-A. For all new designs and replacements of existing 2572-A units, you should use the 2572-B.

Upon release, the 2572-B will replace the 2572-A. We will continue to provide support and repairs for the 2572-A, but it will no longer be manufactured.
