A new Configuration Program v.1.5 is now available for CTI's 2500P-ECC1 Ethernet Communications Coprocessor

Dear Customer,
A new version 1.5 of the Configuration Program for 2500P-ECC1 has just been released.

IMPORTANT NOTE: This version includes Microsoft components that are not certified for Windows XP and may cause the program to crash or produce erroneous results when executed on Windows XP systems. You should install this software **only on computers running Windows 7, Windows 8/8.1, or Windows 10**. **If your system is using Windows XP, you should install V1.4.**
