

WEINTEK's mTV series : an HMI without touch panel, satisfies the needs of a complicated manufacturing area.

WEINTEK's mTV-100

HDMI output allows displaying projects on any sizes of TV / LCD monitors with HDMI interface

HMI device SMALLER, touchscreen BIGGER

The mTV-100 is so slim that it can be fitted in any control cabinet. Via HDMI I/F it can connect to a variety of large size HDTV touchscreen monitors, such as ViewSonic TD2220.

If you do not need the Touch Panel option, any PC screen or TV with HDMI I/F (or DVI-D with an Adapter) will fit.

Compact design and DIN-rail mountable

The mTV100 : easily install in any kinds of applications. More than 300 communication drivers allow communication to many leading brands of PLC.
