CTI Announces Release of New Digital Input Modules for 2500 Series® Compact PLCs

CTI is pleased to announce the release of two new digital input modules for the 2500 Series® Compact PLC system:

- 2500C-16-DI-24V Discrete 24V AC/DC Input Module
- 2500C-16-DI-120V Discrete 120V AC/DC Input Module

These new modules provide connection of 24V and 120V inputs in a format that is not channel-channel isolated. This format can save some wiring time in applications that can use it, since a common return is used for each group of 8 channels.

Features of these modules include:

- Single-wide modules, supporting 16 inputs
- Channel On/Off status indication
- Supports hot-swapping

You can get more information and product bulletins here:
