PRODUCT MATURITY ANNOUNCEMENT

Dear CTI Customer,

CTI is announcing the maturity of the 2500P-ACP1 Application Coprocessor.

This product is directly replaced by the 2500P-JACP Janus Application Coprocessor which has higher performance and many new features, including operation with Simatic 545/555 processors using a new Block Transfer Driver. Applications which use the "CTI 2500P-ACP1 I/O" driver will need to have the configuration converted to use the new Block Transfer driver instead. This process takes only a few minutes in Janus Workbench Software ("JSoft"). See our Tech Tip for guidance on migrating applications from 2500P-ACP1 to 2500P-JACP.

Tech Tip: [Tips for Migrating Applications from 2500P-ACP1 to 2500P-JACP](#)
Product Bulletin: [2500P-JACP Product Bulletin](#)

The new 2500P-JACP is available from stock now.

If you have questions about this maturity announcement, please contact CTI or your CTI Preferred Automation Partner.

Regards,

Robert Peck
Senior Vice President
Control Technology Inc.
