FTSolution for APT

Advanced Editors

FTSolution for APT® allows users to increase programming efficiency through advanced editors. Editing projects in FTSolution for APT is easy because its windows are designed to look and operate like the APT editors with which APT users are familiar. Text and math editors provide new and innovative features that allow programs to be written faster and more accurately with:

Syntax Coloring

Displays keywords, instructions, and variables in different colors

Statement Completion

Allows instructions and variable names to be selected from drop-down lists that are based upon the characters typed so far

Incremental Parsing

Validates logic syntax and reports errors as logic is typed

Code Regions

Hides segments of code allowing users to focus on specific portions of the program

New and innovative features in all editors, like this SFC, allow programs to be written faster with more flexibility

FasTrak SoftWorks, Inc. is a leading provider of software for maintenance management, file change management, and PLC programming. We have been protecting thousands of PLC investments through our commitment to the long-term development, service, and support of programming software for PLCs for more than 30 years.
