

# PLC WORKSHOP SUPERSUITE

## PLC WORKSHOP SUPERSUITE

PLC WorkShop SuperSuite™ provides advanced version control and file management capabilities to PLC programming environments within larger companies. Through the advanced edition of FTVersionTrak, PLC WorkShop SuperSuite adds multi-user capabilities such as enhanced data security, file sharing, and the ability to use multiple repositories.

With PLC WorkShop SuperSuite, you will be able to:

- Share PLC program files among multiple users
- Schedule automated backups of programs from within PLCs
- Store PLC program files under version control in multiple repositories
- Access PLC program files under version control from a centralized server
- Set user rights and security for version control
- Secure access to sensitive files through user logins
- Track changes to any type of file or multiple-file project

Available in two editions, the PLC WorkShop SuperSuite may be used to program the following PLCs:

- CTI 2500 Series™
- Siemens Simatic® 505®
- Modicon Quantum™, Compact, Momentum™, 984™, and 584™
